Benchmark for moving sliding doors

Sliding doors leave no margin of doubt when it comes to practical functionality and clean look. Supreme user friendliness and individually tailored design versatility make them the ideal answer to the demands of modern living. Hettich offers the right sliding door solution for every market segment while meeting the most exacting demands on quality, convenience and functionality.

TopLine XL: Invisibly smart. Whisper quiet

How easy can 80 kg sliding doors be made to run? How gentle can solid fronts be made to close? TopLine XL provides new answers: the concealed premium sliding door system from Hettich makes large doors weighing up to 80 kg run with fascinating ease and smoothness. In outstanding quality and perfected design.

Door elements of any size quietly glide with effortless ease in the top-running sliding door system. The fully concealed Silent System damping function brings added luxury and convenience. The new damper generation provides the last word in luxurious user convenience with every conceivable damper function: in closing and opening direction, in both directions for 3-door applications, collision damping. TopLine XL is synonymous with perfect, horizontal door movement.

The system is surprisingly easy to install and adjust. The sliding doors are simply hooked into the top runner profile. A light press against the carcass is all it takes as well to engage the bottom rollers in the guide profile below the bottom panel. Once fitted, all components are concealed out of view.

Large-format, floor-to-ceiling cabinet designs and alcove solutions are easy to produce too. The integrated height-adjustment mechanism is also accessible with doors in place. This way, doors can easily be aligned with perfect precision. The result: a closed cabinet front with a look of perfection and fascinating beauty.

TopLine L: Unadulterated versatility

The TopLine L sliding door fitting from Hettich satisfies exacting demands with perfection – from ease of installation to convenience of use.

TopLine L meets all practical demands placed on a modern sliding door system while also appealing to the senses. It impresses with its ease of installation, simplicity of height adjustment and luxurious convenience in everyday use. TopLine L provides outstanding running quality even for doors weighing up to 50 kg. The system's non-corroding, tough material ensures years of unrelenting performance.

With the same runner and guide components suitable for solid and aluminium-framed fronts, it provides huge flexibility in the choice of door materials. Particularly convenient: Height can be adjusted with doors hung and closed without having to undo the fixing screws on the runner components. Combined with the Silent System damping function, TopLine L provides added convenience that's noticed but not seen.

TopLine M: Great convenience for small cabinets

The TopLine M sliding door system for wardrobes and hallway units with overlay doors weighing up to 35 kg gives furniture manufacturers and fabricators the option of changing from hinged to sliding door applications with incredible ease. Using the carcass end profiles belonging to the system guarantees full constructional freedom for overlay doors while leaving carcass design unchanged and without altering the production process.

Opting for TopLine M, manufacturers previously favouring inset configurations can align model ranges towards designer-style overlay constructions without major effort.
